

QUALITY CAR & TRUCK REPAIR INC.

Why

Over 30 years of **EXPERT** service *matters*

When *seconds* count, you can count on us!

Whether it is routine maintenance or specialized repair work, no one can service your ambulances better. Quality Car and Truck Repair will protect your investment and keep your vehicles serviced, all within your budget. Since 1981, we have been the facility to keep ambulances ready to go when the crucial call comes in!

When you get the call, any delay can mean the difference between *life and death*. Ambulances are one of the hardest run vehicles on the road today. Because of this, regular service and repairs are needed to keep them safe and dependable. The public counts on YOU to respond quickly in every emergency. When your ambulances need service or repair, you can count on us!

Emergency services has always ensured that response and rescue personnel are trained and certified to appropriate levels based on “accepted standards,” But what about the people you choose to maintain your vehicles?

Quality maintenance and repair of your ambulances is vital to the care of your patient. We feel the same way about your ambulances. To us, your ambulances are our patients. Our emergency vehicle technicians have the necessary equipment and training to identify and correct all malfunctioning mechanical, electrical and module components.

“...any delay can mean the difference between *life and death*.”

We Deliver

Time is of the essence when it comes to your fleet. We save you time by picking up the vehicles when they are due for service and delivering them upon completion...all in a very timely manner. We maintain an extensive inventory of ambulance parts and our technicians are ambulance maintenance and repair specialists. We want to be your alternative to in-house or piece meal on-site maintenance. We can free you of the financial burdens and responsibility of staffing, supplying, operating and maintaining a maintenance facility of your own. We can also free you of the burden and responsibility of coordinating multiple service providers by having one facility that is able to handle any service or repair. We have the necessary skills to handle all the administrative, billing, parts acquisition and general day-to-day activities that comprise an ambulance service and repair facility. No matter whether your fleet is large or small, we can service and repair them all!

WE UNDERSTAND BUDGET CONSTRAINTS

We understand that you need quality service and repair and still stay within your budget! Our team can produce effective repair plans in line with your budget.

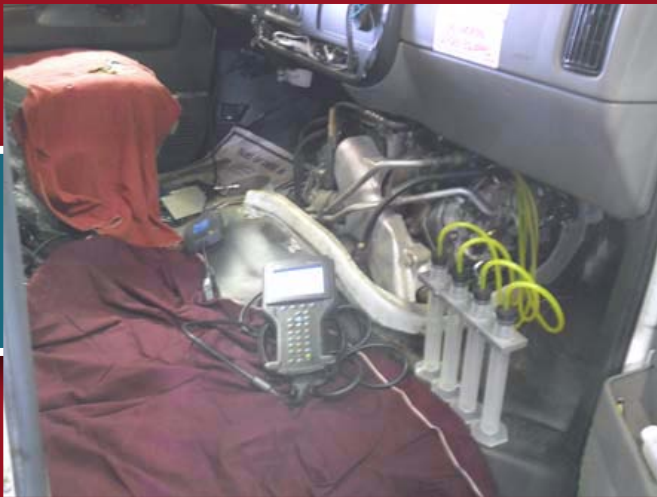

We know that ambulances are specialized vehicles. Many service centers are reluctant to work on them due to the complexity of the integration of module to OEM vehicle chassis. You will not find any reluctance at Quality Car & Truck Repair. We have been servicing ambulances and other emergency vehicles for more than three decades and we know what it takes to keep them running!

Does Your Current Service Provider Offer...

- two EVT Master Ambulance Technicians?
- pickup and delivery?
- factory diagnostic service equipment?
- factory service information?
- 24-hour emergency service?
- fully licensed and insured with over three-million dollars in coverage?
- extensive parts department?

QUALITY CAR & TRUCK REPAIR

PREVENTIVE MAINTENANCE PROGRAMS

We offer a comprehensive preventive maintenance program customized to each vehicle because that is paramount to keeping your vehicles going strong. With our many years of experience, we are able to identify maintenance trends and develop procedures to address them before they become a problem for the operator.

<http://www.evtcc.org/faq.htm>

Our Services Include...

- **Diesel & Gas Engines** – We have a very competent staff of gas & diesel mechanics that have the experience, tools and resources to handle the full range of engine services. Experts on Ford Powerstroke, Duramax and International engines
- **Transmissions** – When it comes to transmissions, we do everything: drain, flush, fill, complete transmission overhaul
- **Electrical Systems** – We have some of the most skilled technicians that have diagnosed electrical problems others could not. We have the experience, certifications and real life skill to track down any electrical problem in the chassis or module.
- **Drivability Problems** – Our ASE Certified and Master Repair Technicians have the experience, tools and resources to find the underlying cause of your ambulance's trouble. Experience and knowledge together keep your fleet on the road.
- **Computer** – The amount of Factory computer diagnostic equipment we have rivals any in the area. This enables us to diagnose your ambulance's computer system and make the right repairs.
- **Brakes** – We offer superior parts and expert service technicians to give your fleet the best in brake jobs.
- **Preventive Maintenance Programs** – We can keep your ambulances from breaking down with our preventive programs. This saves precious time and resources.
- **Heating & Air Conditioning** – We check out the systems periodically to prevent expensive repairs. We have the necessary equipment and training to properly and environmentally effect any repair.
- **Steering & Suspension** – This system has many moving parts and we keep it from breaking down and eroding. A smooth ride and optimal handling is critical for an ambulance. If not properly maintained, the results can be dangerous.
- **Tires** – It all rests on the tires! We make sure they are at peak performance. We have great brands from which to choose.
- **Gauges & Warning Lights** – These are inspected and maintained.
- **Front console switches, gauges, indicators and siren operation are maintained for proper operation.**

- **Alarms** – We keep them audible.
- **Lighting** – Chassis lighting, including back-up alarm as well as dome and fluorescents, are maintained.
- **Doors** – We make sure screws, grab rails, door liners and handles are secure and properly tightened.
- **Body Module & Related Systems** – From service and installation of inverters, COT Preventative Maintenance Inspections to installation and programming of Weldon V-Mux & Road Safety systems, our technicians can do it all!
